

Knock on door Perform hand hygiene	
Greet client by name	
Explain the procedure to the client	
Provide privacy for client - pull curtain	
Put on gloves	
 Raise bed to appropriate working height	
Position client on bedpan correctly using correct body mechanics	
After placing bedpan, raise head of bed to comfortable level	
 Leave tissue within reach of client	
 Leave call light within reach of client	
Leave area until called	
 Wash/assist client to wash and dry hands (use wet wash cloth or a disposable	
wipe)	
 Discards soiled linen in appropriate container or dispose wipe in trash	
 Lowers head of bed if raised	
Gently remove bedpan. Hold bedpan for Test Observer while liquid is poured	
into the bedpan	
Measure output using a graduate	
Lower bed if it was raised	
Empty graduate into toilet/commode	
Remove gloves turning inside out and dispose of properly	
Maintain respectful, courteous interpersonal interactions	
Leave call light or signaling device within easy reach of the client	
Leave water within easy reach of client	
Wash hands - turn on water	
Thoroughly wet hands	
 Apply liquid soap to hands	
 Rub hands together for 20 seconds using friction	
 Using friction, rub interlaced fingers together while pointing downward	
 Clean under fingernails	
Wash all surfaces of hands and wrists with liquid soap	
Rinse hands thoroughly under running water with fingers pointed downward	
Dry hands on clean paper towel(s)	
Turn off faucet with a SECOND (last) clean dry paper towel, or with a dry section	
 of a previously used paper towel	
 Discard paper towels to trash container as used	
 Does not recontaminate hands at any time during the hand washing procedure	
Record output on recording form Candidate's measurement is within 25cc/ml of Observer's reading

### ISOLATION GOWN AND GLOVES - EMPTYING A URINARY DRAINAGE BAG

Perform hand hygiene	
Face the back opening of the gown	
Unfold the gown	
Place arms through each sleeve	
Tie the neck opening	
Tie the waist in the back or side,	
Front and back of clothing is covered as completely as possible	
 Put on gloves	
Gloves overlap gown sleeves at the wrist	
Knock on door	
Greet client by name	
Explain urinary output procedure to client	
Provide privacy for client - pull curtain	
Leave call light or signaling device within easy reach of the	
client	
Leave water within easy reach of client	
Place a barrier on the floor under the drainage bag	
Place the graduate on the previously placed barrier	
Open the drain to allow the urine to flow into the graduate	
Completely empties urinary drainage bag.	
Do not touch the graduate with the tip of the tubing	
Close the drain	
Wipe the drain with antiseptic wipe	
Secure drain	
Place a barrier on a flat surface	
Place graduate on previously placed barrier on a flat surface	
With graduate at eye level, measure output	
Empty graduate into toilet/commode	
Leave client in a position of safety and comfort	
Maintain respectful, courteous interpersonal interactions	
Remove gloves turning inside out or uses the alternate method of pulling/poopp	
the gown off by pulling on the front of the gown.	
Removes gloves before removing gown or uses the alternate	
method of pulling/popping gown off by pulling on the front of the	
gown with gloves on.	
Disposes of gloves in appropriate container or peels gloves off	
keeping them inside out and rolled up inside the gown.	
Unfasten gown at the neck, if not using alternate method of	
removal.	
Unfasten gown at the waist, if not using alternate method of	
removal.	
Remove gown by folding soiled area to soiled area	
Bare hands never touch soiled surface of gown	
Dispose of gown in trash container	
Wash hands - turn on water	
Thoroughly wet hands	
Apply liquid soap to hands	
-Continued on next page-	

CONTINUED: ISOLATION GOWN & GLOVES – EMPTYING A URINARY DRAINAGE BAG	
Rub hands together for 20 seconds using friction	
Using friction, rub interlaced fingers together while pointing downward	
Clean under fingernails	
Wash all surfaces of hands and wrists with liquid soap	
Rinse hands thoroughly under running water with fingers pointed downward	
Dry hands on clean paper towel(s)

#### **BLOOD PRESSURE**

Knock on door	
Greet client by name	
Perform hand hygiene	
Explain procedure to client	
Position client with forearm relaxed and supported in a palm-up position,	
approximately at the level of the heart	
Roll client's sleeve up about 5 inches above the elbow	
Apply the appropriate size cuff around the upper arm just above the elbow	
Correctly align cuff over brachial artery	
Clean earpieces of stethoscope appropriately and place in ears	
Clean diaphragm	
Locate brachial artery with fingertips	
Place stethoscope diaphragm over brachial artery	
Hold stethoscope diaphragm snugly in place	
Inflate cuff to 160-180mmHg or 30mmHg above where pulse was last	
heard or felt	
Inflates the blood pressure cuff no more than two times per arm	
if using the one step method - (May have one additional	
inflation attempt if using the two step method - must wait an	
appropriate time period between inflations)	
Slowly release air from cuff to disappearance of pulsations	
Remove cuff	
Perform hand hygiene	
Maintain respectful, courteous interpersonal interactions at	
all times	
Leave call light or signaling device within easy reach of the	
client	
Leave water within easy reach of client	
Record blood pressure reading on recording form	
Candidate's recorded systolic and diastolic blood pressure is	
within 6mmHg of the Test Observer's	

 Knock on door
Greet client by name
Perform hand hygiene
Explain procedure to client
Line bottom of sink (towel, washcloth or paper towels) with a protective lining
or fill with water to prevent damage to the dentures in case they are dropped
Put on gloves
Carefully remove dentures from cup
Handle dentures carefully to avoid damage
Rinse denture cup
Never put dentures in/on a contaminated surface
 Apply denture cleanser to toothbrush
Thoroughly brush dentures, including the inner surfaces of upper and/or lower
dentures
Thoroughly brush dentures, including the outer surfaces of upper and/or lower
dentures
Thoroughly brush dentures, including the chewing surfaces of upper and/or
lower dentures
Thoroughly brush dentures, including the denture groove or plate that touches
gum surface
Rinse dentures using clean cool running water
Place dentures in denture cup
Add cool clean water to denture cup
Rinse and dry equipment and return to storage
Discard sink's protective lining in an appropriate container, or drain sink
Removes gloves turning inside out and dispose in appropriate container
Perform hand hygiene
Maintain respectful, courteous interpersonal interactions at all times
Leave call light or signaling device within easy reach of the client
Leave water within easy reach of client

## FEEDING A DEPENDENT CLIENT A MEAL IN A CHAIR

 Knock on door	
Greet client by name	
Perform hand hygiene	
Explain procedure to the client	
Candidate reads diet card aloud to client.	
Protect clothing from soiling by using clothing protector	
Wash client's hands before feeding with wet wash cloth or disposable wipe	
Discards soiled linen in appropriate container or disposes wipe in trash can	
Sits to feed client.	
Describe the foods being offered to the client	
Offer fluid frequently	
Offer small amounts of food at a reasonable rate	
Allow client time to chew and swallow	
Wipe client's hands and face during meal as needed	
Leave client clean and in a position of comfort	
Perform hand hygiene	
Maintain respectful, courteous interpersonal interactions at all times	
Leave call light or signaling device within easy reach of the client	
Leave water within easy reach of client	
Record intake of total solid food eaten as a percentage on recording form	
Candidate's calculation must be within 25% of the Observer's	
Record fluid intake as mls consumed on recording form	
Candidate's calculation is within 30 mls of the Observer's	

Knock on door	
Greet client by name	
Perform hand hygiene	
Explain procedure to the client	
Provide privacy for client - pull curtain	
Fill foot basin with comfortably warm water	
Remove non-skid sock from the correct Test Observer stated side	
Immerse foot in comfortably warm water for 10 to 20 minutes (time is to be verbalized)	
Use water and soapy washcloth	
Wash entire foot	
Wash between toes	
Rinse entire foot	
Rinse between toes	
Dry foot thoroughly, dry between toes thoroughly	
Offer to cut client's toenails	
Warm lotion by rubbing it between hands	
Massage lotion over entire foot, do not get lotion between toes	
If any excess lotion, wipe with a towel	
Replace non-skid sock on foot	
Pour used water in toilet/commode or sink	
Rinse and dry basin	
Return equipment to storage area	
Place dirty linen in hamper	
Leave client in position of safety in proper alignment in the chair	
Perform hand hygiene	
Maintain respectful, courteous interpersonal interactions	
Leave call light or signaling device within easy reach of the client	
Leave water within easy reach of client	

Knock on door	
Greet client by name	
Perform hand hygiene	
Gather linen	
Transport linen away from body	
Place clean linen on a clean surface - (bedside stand, chair, or overbed	
table)	
Explain procedure to client	
Provide privacy for client - pull curtain	
Direct Observer to stand on the opposite side of the bed or raise side rail	
opposite working side of bed	
Raise bed to appropriate working height	
Client is to remain covered at all times with sheet or gown.	
Assist client to roll onto side	
Roll or fan fold soiled linen, soiled side inside, to the center of the bed	
Place clean bottom sheet on mattress along the center of the bed and roll or	
fan fold against the client's back and unfold remaining half	
Secure two fitted corners	
Direct Observer to opposite side of the bed or use side rails	
Assist the client to roll over the bottom linen, preventing trauma and	
avoidable pain to client	
Remove soiled linen without shaking	
Avoid placing dirty linen on the overbed table, bedside stand, chair or floor	
Avoid touching linen to uniform	
Dispose of soiled linen in hamper	
Pull through and smooth out the clean bottom linen	
Secure the other two fitted corners	
Client's body never touches bare mattress	
Place clean top linen over covered client	
Remove used top linen keeping client unexposed at all times	
Tuck in clean top linen at the foot of bed	
Make mitered corners at the foot of the bed	
Apply clean pillowcase with zippers and/or tags to inside	
Gently lift client's head while replacing the pillow	
Lower bed if it was raised	
Lowers side rail, if it was used	
Perform hand hygiene	
Maintain respectful, courteous interpersonal interactions at all times	
Leave call light or signaling device within easy reach of the client	
Leave water within reach of client	

Knock on door
Greet client by name
Perform hand hygiene
Explain procedure to the client
Provide privacy for client - pull curtain
Drape the chest with towel to prevent soiling
Put on gloves
Apply toothpaste to toothbrush
Brush all inner surfaces of all upper and lower teeth
Brush all outer surfaces of all upper and lower teeth
Brush all chewing surfaces of all upper and lower teeth
Clean tongue
Assist client in rinsing mouth
Wipe client's mouth
Remove soiled linen
Place soiled linen in hamper
Empty emesis basin
Rinse emesis basin
Dry emesis basin
Rinse toothbrush
Return equipment to storage
Remove gloves turning inside out and dispose of properly
Leave client in position of comfort
Perform hand hygiene
Maintain respectful, courteous interpersonal interactions at
all times
Leave call light or signaling device within easy reach of
the client
 Leave water within easy reach of client

### PIVOT-TRANSFER A WEIGHT-BEARING CLIENT FROM BED TO WHEELCHAIR USING A GAIT BELT

Knock on door	
Greet client by name	
Perform hand hygiene	
Explain procedure to client	
Obtain a gait belt	
Position wheelchair at foot or head of bed	
Wheelchair touches bed.	
Lock wheelchair brakes	
Lock bed brakes	
Bring client to a sitting position using proper body mechanics	
Ensures client's feet are flat on the floor.	
Assist client to put on non-skid socks	
Place gait belt around client's waist	
Tighten gait belt so that fingers can be slipped between gait belt and client	
Grasp the gait belt in underhand grip with both hands to stabilize the client	
Asks client if he/she is stable/okay/dizzy.	
Bring client to a standing position using proper body mechanics	
Do not ambulate the client	
Assist client to pivot and sit in wheelchair in a controlled manner that ensures safety	
Remove gait belt	
Leave client in a position of safety and comfort	
Perform hand hygiene	
Maintain respectful, courteous interpersonal interactions at all times	
Place client within easy reach of call light or signaling device	
Place client within easy reach of water	

#### PIVOT-TRANSFER A WEIGHT-BEARING CLIENT FROM WHEELCHAIR TO BED USING A GAIT BELT

Knock on door	
Greet client by name	
Perform hand hygiene	
Explain procedure to client	
Obtain a gait belt	
Position wheelchair at foot or head of bed	
Position wheelchair at a slight angle to the bed	
Wheelchair touches bed	
Raise bed to same level as wheelchair seat	
Lock wheelchair brakes	
Lock bed brakes	
Place gait belt around client's waist	
Check gait belt for fit by sliding fingers under belt to determine if it is snug but	
not too tight	
Ensure client's feet are flat on the floor	
Instruct client to place hands on wheelchair arm rests	
Asks client if he/she is stable/okay/dizzy.	
Grasp the gait belt in underhand grip with both hands	
Bring client to a standing position using proper body mechanics	
Do not ambulate client	
Assist client to pivot and sit on bed in a controlled manner that ensures safety	
Remove gait belt	
Remove client's shoes	
Assist client to lie down in the center of the bed, supporting extremities as	
necessary	
Make sure client is comfortable and in good body alignment	
Perform hand hygiene	
Maintain respectful, courteous interpersonal interactions at all times	
Leave call light or signaling device within easy reach of the client	
Leave water within easy reach of client	

## RANGE OF MOTION (ROM) LOWER EXTREMITIES (HIP AND KNEE)

	-
 Knock on door	
Greet client by name	
Perform hand hygiene	
Explain procedure to the client	
Provide privacy for client - pull curtain	
Position bed flat	
Position client supine	
Position client in good body alignment	
Support joints at all times on the side indecated by the Test Observer.	
 Ask if causing any discomfort or pain sometime during ROM procedure	
 Move the entire leg away from the body (abduction)	
Move the entire leg toward the body (adduction)	
Complete abduction and adduction of the hip at least three times	
Continue to correctly support joints by placing one hand under the client's	
knee and the other hand under the client's ankle	
Bend the client's knee and hip toward the client's trunk (flexion of hip and	
knee at the same time - may also do separately)	
Straighten the knee and hip (extension of knee and hip in the same motion -	
may also do separately)	
Complete flexion and extension of the knee and hip at least three times	
Do not force any joint beyond the point of free movement	
Leave client in a comfortable position	
Perform hand hygiene	
Maintain respectful, courteous interpersonal interactions at all times	
Leave call light or signaling device within easy reach of the client	
Leave water within easy reach of client	

## RANGE OF MOTION (ROM) UPPER EXTREMITIES (ONE SHOULDER)

Knock on door	
Greet client by name	
Perform hand hygiene	
Explain procedure to the client	
Provide privacy for client - pull curtain	
Positions the bed flat	
Position client on back	
Position client in good body alignment	
Support joints at all times on the side indicated by the Test Observer.	
Ask if causing any discomfort or pain sometime during ROM procedure	
Raise the client's arm up and over the client's head (flexion)	
Bring the client's arm back down to the client's side (extension)	
Complete flexion and extension of shoulder at least three times	
Continue same support for shoulder joint	
Move the client's entire arm out away from the body (abduction)	
Return arm to side of the client's body (adduction)	
Complete abduction and adduction of the shoulder three times	
Do not force any joint beyond the point of free movement	
Leave client in a comfortable position	
Perform hand hygiene	
Maintain respectful, courteous interpersonal interactions at all times	
Leave call light or signaling device within easy reach of the client	
Leave water within easy reach of client	

Knock on door	
Greet client by name	
Perform hand hygiene	
Explain procedure to client	
Provide privacy for client - pull curtain	
Position bed flat	
Raise bed to appropriate working height	
Ensure that the client's face never becomes obstructed by the pillow	
Direct Observer to stand in position opposite working side of bed to ensure safety, or use side rails, or always turns client towards self	
From the working side of bed - move client's upper body toward self	
From working side of bed - move client's hips toward self	
From workig side of bed - move client's legs toward self	
Move to opposite side of bed, if Observer wasn't directed, or side rails are not	
used and turn client toward self, otherwise may remain on the working side of	
the bed and turn client toward the Observer or raised side rail	
Assist/turn client onto the correct side as read to him/her in the scenario	
Check to be sure client is not lying on his/her downside arm	
Maintain client's correct body alignment with head of bed flat.	
Place support devices under the client's head	
Place support devices under client's upper arm	
Place support devices behind client's back	
Place support devices between client's knees and ankles	
Lower bed, if it was raised	
Lower side rail, if it was used	
Performs hand hygiene	
Maintain respectful, courteous interpersonal interactions at all times	
Leave call light or signaling device within easy reach of the client	
Leave water within easy reach of client	

### UNDRESSING AND DRESSING A BEDRIDDEN CLIENT

Knock on door	
Greet client by name	
Perform hand hygiene	
Explain the procedure to the client	
Provide privacy for client - pull curtain	
Keep client covered while removing gown	
Remove gown from unaffected side first	
Place used gown in laundry hamper	
When dressing the client in a shirt, always dresses the weak side first.	
When dressing the client in a shirt/blouse, insert your hand through the sleeve	
of the shirt/blouse and grasp the hand of the client	
When dressing the client in sweat pants assist the client to raise his/her	
buttocks or rock client side to side and draw the pants over the buttocks and	
up to the client's waist without exposing the client.	
When putting on the client's socks, draw the socks up the client's foot until	
they are smooth	
Leave client in correct body alignment	
Leave the client properly dressed	
Perform hand hygiene	
Maintain respectful, courteous interpersonal interactions at all times	
Leave call light or signaling device within easy reach of the client	
Leave water within easy reach of client	

### VITAL SIGNS - TAKING & RECORDING A RADIAL PULSE & RESPIRATIONS

Knock on door Greet client by name
Perform hand hygiene
Explain procedure to client
Locate the radial pulse by placing tips of fingers on the thumb
side of the client's wrist
Count pulse for 60 seconds
Count respirations for 60 seconds
Perform hand hygiene
Maintain respectful, courteous interpersonal interactions at
all times
Leave call light or signaling device within easy reach of the client
Leave water within easy reach of the client
Record pulse count on the recording form
Candidate's recorded pulse rate is within 4 beats of the
Observer's recorded rate
Record respirations count on the recording form
 Candidate's recorded respiratory rate is within 2 breaths of the Observer's recorded rate
