

New MAP Certification ‘Test Packet’ for Medication Administration Demonstration

In an effort to support Service Providers in accessing the tools needed to proctor the medication administration component of the MAP Certification Test, DDS, DMH, MRC, and DCF have created a Test Packet to be used for MAP Certification testing purposes only. A complimentary Test Packet is being sent to the Executive Director for each Service Provider soon.

One Test Packet can be used as many as 48 times. If you are the person responsible for proctoring tests or arranging testing for your agency, please check with your Executive Director to obtain this Test Packet.

Additional Test Packets can be purchased by Service Providers from Long Term Pharmacy Solutions (LTPS) at a cost of \$15 per multiuse Test Packet. Another option is to print the documents in the Test Packet from the MAP website at www.mapmass.com or www.hdmaster.com and obtain the corresponding blister packs from your own pharmacy or MAP Trainer.

The anticipated start date for this process is April 1, 2021.

If you have any questions, please contact your DDS, DMH, MRC or DCF MAP Coordinator.

Stay well,

Sharon Oxx RN, CDDN

Director of Health Services, Massachusetts DDS
